### JOB FUNCTION/PURPOSE

- Immediate full-time position for an experienced Fiber Splicing Technician for our telecommunications division. Individual will primarily be working on client projects involving new build out services or emergency restoration services. Company truck and trailer provided with the position. The end goal is providing maximum operating efficiency.
- ***Our Home Office is in Paoli, IN, but work will be in various locations.***

### DUTIES AND RESPONSIBILITIES

- Safety is first priority!
- Candidate will be responsible for the terminating, splicing, documenting and testing of all fiber optic cables within the company's fiber optic networks and their related equipment.
- Responsible for customer premise installations, including racking, cabling, bonding and grounding.
- Coordinate fiber activities with other departments and the Manager of Outside Plant construction.
- Perform ring cuts on live fiber without affecting existing services.
- Perform fiber tests with OTDR's, light source and meters.
- Terminate, splice, bonds/grounds and tests fiber optic equipment to division standards.
- Provide accurate equipment location, splicing and terminating records for the fiber database.
- Assist the Construction and Engineering departments in accepting and turning up the fiber network.
- Build bays, racking, jumper ducts and other network elements needed for the installation of fiber optic equipment and patch and panels.
- Monitor, communicate and perform corrective actions to fix problems affecting any fiber or fiber related equipment.
- Install demarcation enclosures, switches and other telecom equipment.
- Must have experience with the following equipment: fusion splicer, mechanical splicer, OTDR, power meters, traffic identifiers, digital multi-meters, cleavers, strippers, buffer tube splitters, cable ring tools, hand tools, toners, rodders, ladders, bucket trucks, etc.

## JOB DESCRIPTION

- Ability to work under minimal supervision. And apply technical expertise to evaluate problems and implementing the best solutions.
- Work well under pressure and deadline environments.
- Work a variety of schedules including normal duty and on-call duty. Schedule may include periodic travel and overnight stays.

### COMMUNICATION RESPONSIBILITIES/ORGANIZATIONAL RELATIONSHIPS

- Candidate will be expected to interact with and communicate well with Superintendent, area Managers, co-workers and customers.
- Must complete I-9 E-verify form; pass a drug screen; pass a background check and complete new hire orientation and safety videos.

### EDUCATION & EXPERIENCE

- Candidate must have at least 3 years of experience in modern Fiber Splicing Techniques for the telecommunications industry.
- Knowledge of OTDR and testing fiber.
- Valid driver's license required.
